2016 | Motohiro Kamei, MD, PhD
2017 | María H. Berrocal, MD

COLUMBIA UNIVERSITY MEDICAL CENTER
Department of Ophthalmology
Edward S. Harkness Eye Institute
635 West 165th Street
New York, NY 10032
The Stanley Chang, MD Lectureship was established in 2011 in honor of this outstanding physician, surgeon, teacher, and researcher. This lectureship exists to honor his major contributions to the Edward S. Harkness Eye Institute at Columbia University Medical Center and to the field of ophthalmology.

Dr. Hilel Lewis provided the initial funding for the lectureship with the purpose of inviting a national or international clinician-scientist in the field of retinal vision to give a presentation as part of the department’s annual lecture program. In late 2011, the Chang Lectureship received additional funding from the Annenberg Foundation, made through the auspices of Steven Ames.

Dr. Chang became the Edward S. Harkness Professor and Chairman of the Department of Ophthalmology at CUMC in 1995 and served as chairman for 17 years until 2012. He remains an active faculty member as the K.K. Tse and Ku Teh Ying Professor of Ophthalmology in the department.

**P R O G R A M**

**“Lessons Learned from the British Columbia Retinal Diseases Program”**

Gloria and Louis Flanzer Amphitheatre, 
Eye Institute, 7th Floor

Edward S. Harkness Eye Institute, 635 West 165th Street, New York, NY

David Maberley, MD, MSc is Professor and Head of the University of British Columbia’s Department of Ophthalmology and Visual Sciences, Site Head of Ophthalmology at Vancouver Acute Hospitals, and Regional Head of Ophthalmology for Vancouver Coastal Health Authority.

Following residency at the University of Toronto, Dr. Maberley undertook retina fellowship training at Queen’s University where he also completed a Master’s of Science in Community Health and Epidemiology. He completed his fellowship training in medical and surgical retina at Columbia University and Manhattan Eye, Ear, and Throat Hospital in New York City.

In 2011, Dr. Maberley established the Canadian Retina Society and served as its first president until 2015. He is past secretary of the Canadian Ophthalmology Society and retina section editor for The Canadian Journal of Ophthalmology. Dr. Maberley’s research interests have included epidemiology, big data, and policy development for underserved populations. He is also involved in clinical trial design and translational research. Dr. Maberley has expertise in the surgical management of complex retina diseases including pathologic myopia, proliferative vitreoretinopathy, and diabetic retinopathy.
